

Xerox Disc Duplicators

Efficient and Reliable In-House Disc Production

The Xerox Duplicator is a fast and convenient way to make numerous copies of CD's and/or DVD's. With the ability to produce from 1 to 15 copies simultaneously from a single master source, the range of Xerox Duplicators is suitable for any user.

Standalone operation

The Xerox Duplicator can operate independently from a PC. The entire unit is operated from an easy to use LCD interface on the top front panel.

Transfer image files from a PC directly to the duplicator's Hard Drive (HDD)

Connect the duplicator to a PC by USB connection and transfer the image file directly on to the duplicator's internal HDD. You no longer need to spend the extra time and effort to generate a master disc to initiate the duplication process.

Improved load and copy supported

If making copies from an original CD or DVD, Xerox Duplicators offer a "Load and Copy" function. This option allows the duplicator to make copies from the internal Hard Drive quickly by simultaneously copying onto the blank media while loading the data on to the hard drive. All future duplication will be performed by the Duplicator's internal HDD.

Supports all formats of CD and DVD media

Xerox Duplicators support all common recordable and rewritable CD & DVD formats as well as special items including CD-TEXT, ISRC, and Over-Burned CD.

Large capacity buffer memory

When making copies from the reader, large capacity buffer memory allows more data to be stored in flash from 8MB up to 256MB (depending on the model). It keeps all drives burning at the same speed without pausing (known as buffer under-run) for a more stable and reliable duplication at higher burning speeds.
